LEGISLATIVE POLICE COMMITTES.

The Committee met by a journment yesterday mora-ing. Messrs Stuyvesact, Baker and O'Kee'e were present. Mr Stuyvesant was elected Chai man and after an hour color proceeded to examine Mr. Muckellar, well known as the leader of the contumations three who dared to defy the great Briggs.

William Mackellar offirms-I have been eggared as erty Clerk; I have no idea of the value of property that has come into my hands since lett: I can give you the rumber by reference to the booker [here taree policemen brought in three back-leads of books: I the eappears to have been 371 lots since May, 1819, each lot ire uses usually several articles; there is very stille of this property that has not been claimed; a small part on unclaimed was sold, of which I made a return to the Contreller, and paid the money into the City Tressary; my cutics are the general elerical business of the office. It take complaints against policement; they are made in this way: the party who feels himself aggriseral by the conduct of a policeman or officer coness up and makes a complaint, and we take it down in writing; we then send for the officer, who appears the collect and makes his statement in any service. at the office and makes his statement in an ever to the complaint, and has an opportunity to put in his defenre under oath; if he wishes to examine the party we summon the complainant in order that he the party we summen the complainant in order that he may crost-exemine him; after all the technony is through, the officer has the choice of submitting the case to the Child of Police to decide upon the evidence as taken in writing, or it may go on for trial; after compains are disposed of, they are filed with the Clerk of the Common Council; the remuse to the Chief of Police are filed in our office; ever, six month the captains of the Police are directed by general order to make a return of all suspicious persons and places, these set lock houses of preciting on, and as far as notable their inmatts, as also gambling-houses, more another policy offices. Ac.; whenever a party able ther inmates, as also gambling-houses, more anction shops, policy-sdices. Ac.; whenever a party makes a completat at the odics of the Chief of Police that he has been definanced in a more k-sur-tion store, it is customary to take the com-plainant immediately before a magistrate and let han make his compaint on oath, in order that a war-rant may be issued and the defendant a rested; Mr. Mackeller very salifactorily explained the man-Mr. Macrellar very salifactorily explained the insurer in which the tire carticals of block true, and incidentally stated that the black true, whose mysterious fate created such a sensation last Summer was entered on the book as one black trues, seeked in front, marked J. I. Norton, left by Eli Devoe, and not to be delivered up except on the order of the Chieffit was collivered to the Surrogate, Mr. A. W. Bradford; he decided that any notice had been sent to Pathers, but he was to be accepted and said that any it was celivered to the Surrogate, Mr. A. W. Bradford; he decided that any notice had been sent to Pat Hearn hat he was to be arrested, and said that any such ascertion was a stander. He continues: A prisoner may be locked up at the Chief's olice for a couple of hours, before going before a magis rate or committed, if he demands coursel, he of course is permitted to see him. I have never known a man to be locked up all night without the order of the Mayor or some maj strate, there are culv two Policemen in the Chief's office row who were there when I first went there, and they have been off and on during that time, within the last three years I do not know how many charges have taken piace among the detailed Policemen at the office, there are fourteen detailed there; there are not more than six who were there there years ago; there have been two or three changes this year; changes take place more or less every year; from Mayor Havemeyer to the present time the Mayor has generally detailed the men, but the Chief claims the right; I have never known of the Chief giving orders to warm people from going into gambling houses; there are five clerks in our office; all the business we do down stairs is in black and white the cuty of Clerk to the Board of Police Commissioners is to take complaints and evidence; I know that he must do that, but of course I cannot state his other durice; Col. Ming is the clerk now; I keep a book with names of policemen and dates of their appointment; there are cases where policemen receive rewards by permission of the Mayor, beside their salaries; at the Crystal Palace there were some twenty two men ent who were relieved weesly and who re of November, 1823. THE PEOPLE of the STATES for in certain cases, the deputy keeper schoing the arest, very and frequently the officer making the arest, received a portion of the lawyer's fees; I have heard, in some instances, of clerks participating in the fees which the laywers received; I have been frequently convinced, from circumstances that came under my knowledge, that such was the case; could I have obtained tangible evidence of the fact. I should have made an examination of the surject myself; more recently, since I have left the bench, I have known lawyers to bid as high as 30 and 40 per cent of their fees to I expers and officers to obtain cases for them; this has led to great injustice toward p isoners without means; the poor have frequently been convicted on a comparatively slight testimony, inasanuch as the efficers have been very indefatigable in procenting testimory against the party; those, on the other kand who have the means of employing counsel, interest the officers in their behalf, and thus escape the purishment which they deserve; I think the lasty of which I was speaking resulted from a system which sprang up under the former organization of the Police Department, when there was a force called watchmen, and there were only fifty police officers in the day time; it was then customary for the magistrates and justices to sit alternate weeks; they were required to be at the Police Courts from the time of the discharge of the watch in the morning till night; the watch were discharged an hour before sunarse, and were poeted an hour after sunset; the justices and clerks became exhausted in a week; the following week was then devoted to faishing up the business of the previous week; after the reorganization of the Police Department the magistrates and clerks were required to be at the Chief of Police's office from 7 in morning to 7 in the evening one half of the year, and from 5 in the morning to 6 in the evening the othor half; and the same system was confined of one magistrates when such a magistrate was on the bench, which made his cut were more ambitious to strend to their duties than others; policemen would oftentimes prefer making artests when such a magistrate was on the bench, which made his cuttes frequently more onerous than those of his secociate; the plan of electing criminal justices by the people is very good in theory, but bad in practice; I think it thie to expect an independent criminal judiciary, so long as they are subject to the popular will; if a magistrate performs his duty fear-leasy and legally, he is almost sure to be conside from office at the expiration of his term; our primary elections for many years have been controlled by a class of min cailed shoulder hitters, gamblers, nack and indicative feelings toward the magistrate who has fearlesly dealt out the law to them, and by the expectation of electing some one as his successor who will be more lemint to ward the nice what is the frequently the case, their services are secured by another class of men, who may be termed poli leal contractors; for the proper transaction of the business at the Police Courts, the Justices ought to have the appointment of their own clerks; I think, also, that where priseners are committed to the various prisens, in default of the payment of a fine which they have been arjudged to pay, the seepers of the several prisons, upon the payment of such fine or fixes to them, should be required to report forthwith to the magistrate who made the committal, and to pay the money into Court in order that a proper record may be made of the same, and that it may be paid into the City Treasury, justical of being paid to the Governors of the Samons, with three ludges, to rry all cases of misdemeanor, with power to hole jury trials twice week. I am satisfied that during the past year tome of the most vigitant men is our Police force, whose term of appointment had expired, have been superseded by others, many of whom were deficient in the necessary qualifications to

make a good policeman, and some of them for in-termed, have a not been suspended and dismissed from the separtment. Many of the superkinded police non were suspended and their successors appointed panels non-were research to believe actedy upon positical grands; so that it is reactly perceived, by any one who will examine into the matter, that our whole ir minal juria-pundered, therefore with the Police department of the city, is subject to political minimum, thereby com-pelling the members of the departments connected the work has been modificious by trade to the great therewith to become politicisus by trade, to the great detriment of the public interest; I, therefore, con-sider a radical change in the present system highly

Moees Brush was called. The witness came forward very reluctantly. He said he had been aword once, and his name bandied about; now he didn't want that to occur again; the testimony which he gave before the Mayor was on record; couldn't the Committee read that? the complaint against Lieut. O'Keefe was dismissed; if this would correct the abuses he didn't mind being sworn, but he hadn't any faith that it would. He asked the Alderman to spare his fee inge. Mr. Briggs promised to do so; and then the witness being awon, said: I am doorman of the faith that it would. He asked the Alderman to spare his fee inge. The disease, on Monday, exhibited still more deficite symploms of madness, a flashing of the eye and frothing of the mouth accompanying the convulsions. Drs. Leonard and Gould were called, and asministered chloroform which temporarily produced a quieting effect; but relief was beyond the skill of man. The awfal sufferings of the child were protracted until Wednesday evening, when it was relieved by death.
